For each career you save, complete the Explore This Career section:

1. How I Feel About This Career

2. My Notes - Type your answer to the question

"What classes or activities could help me increase the skills related to this career?"

3. Important Factors

4. Likes & Dislikes

Early childhood educators care for and teach infants, toddlers, and preschool children. They play a key role in shaping these young children's futures.

JOB DESCRIPTION

You may not remember your first few years of life, but they influenced who you are today. The people who took care of us back then also affected who we are now. When you think about it that way, early childhood educators have very important jobs.

Early childhood educators are called ECEs for short. They work with children in nursery schools, daycares, and similar settings. Most ECEs work with children aged 2 to 5. Some daycares take children up to 10 years old in after-school programs.

ECEs must know how children develop on a mental, physical, social, and emotional level. They are trained to design games and activities that are both fun and educational. They know how to treat children based on their age.

ECEs teach young children a variety of things. They teach them how to read and why they should share. They teach them not to hit others and how to deal with anger. Teaching these life skills requires different strategies and techniques.

ECEs must be creative and resourceful. They plan activities that help children develop and build self-esteem. They also must be able to keep them interested and motivated. They organize daily routines that help kids feel comfortable and secure.

ECEs often use arts and crafts in their classroom. These projects help to bring out children's creativity. Art

CAREER CLUSTER

You will want to keep scrolling all the way to the bottom of the page to learn all about the career you selected. If you don't know what a particular career does read the JOB DESCRIPTION. If you really like a career check out the SIMILAR CAREERS to find out what other careers may use the same skills or education as the career you like.

INCREASING DEMAND

The demand for this career is increasing. Its growth rate is slower than the national average growth for all careers. But, many people are needed to work in this career compared with other careers.

CORE TASKS

✓	Consult with parents about their children's development
✓	Design and lead learning games and activities
✓	Establish and maintain routines for children
✓	May specialize in teaching children with disabilities
✓	Use arts, crafts, and music to help children learn

WORKPLACE

🕒	40 hours a week, with some early mornings or evenings
👤	Caring for many small children at once can be demanding
🔧	May need to lift and carry children
👥	Work closely with children and other educators
📁	Work for nursery schools, preschools, daycares, or community centers, or are self-employed
☀️	Work indoors in classrooms and playrooms, and outdoors on playgrounds

Creator

Helper

Persuader

Organizer

WORKING CONDITIONS

Early childhood educators work in:

- nursery schools
- preschools
- daycare centers
- community centers
- recreational facilities

Some start their own child care businesses. Many ECEs work full time, about 40 hours a week. Those who work for daycare centers may work longer hours, starting early in the morning and ending late at night. Most daycare centers are also open in the summer, while schools are not. Directors of daycares may work 10 or 11 hours a day. They often have extra administrative duties to finish before they can go home.

ECEs care for many children at once. They have to watch children in the classroom and outside in the playground. Caring for toddlers involves helping them eat and brush their teeth. They also help toddlers go to the washroom and wash their hands. ECEs who work with children with a disability have even more hands-on duties.

EARNINGS

ECEs can be employed by a variety of businesses. They typically work full time and are paid hourly. Some ECEs are self-employed and run their own business.

In general, ECEs make between \$8 and \$16 an hour. This means that full-time workers can make up to about \$33,000 a year. Assistants earn the lowest wages.

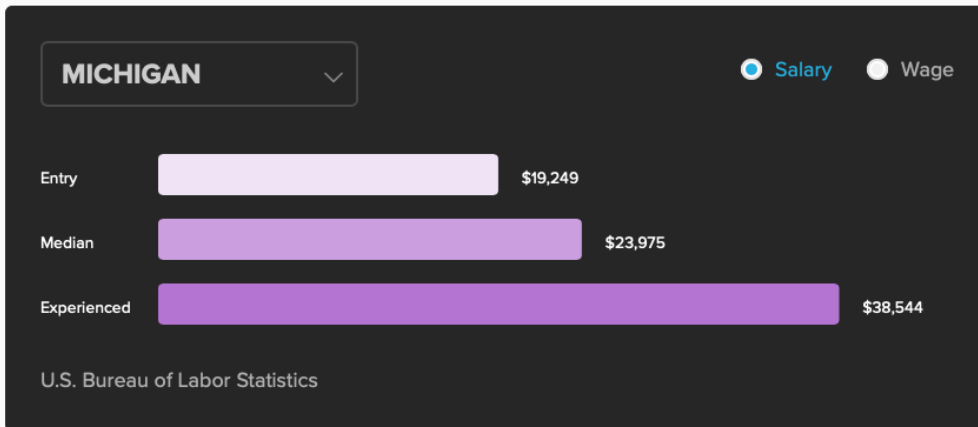

Preschool educators earn between \$10 and \$26 an hour. Their median wage is \$14 an hour. This adds up to about \$20,000 to \$55,000 a year, with a median of \$29,000 a year.

Supervisors and directors can make anywhere from \$14 to \$41 an hour. This adds up to a range of about \$30,000 to \$85,000 a year.

Earnings for ECEs depend on many factors. These can include their experience, education, employer, and location. ECEs who work for large daycare centers will make more than those who work for smaller organizations. ECEs with a college degree will make more than those with just a high school diploma.

Earnings for self-employed ECEs depend on the hours they work and how many children they look after. They might have to market themselves to find children to care for.

Some full-time ECEs will receive benefits, such as health coverage and paid vacation days. Those who are self-employed must provide their own benefits. These educators may have a side job to make more money.

SAMPLE CAREER PATH

TITLE / ANNUAL SALARY RANGE	REQUIREMENTS	RESPONSIBILITIES
ASSISTANT EARLY CHILDHOOD EDUCATOR \$17,000 - \$20,000	<ul style="list-style-type: none">• Volunteer experience working with children	<ul style="list-style-type: none">• Assist fully qualified ECEs in the classroom
EARLY CHILDHOOD EDUCATOR \$20,000 - \$30,000	<ul style="list-style-type: none">• Degree in early childhood education• A professional designation	<ul style="list-style-type: none">• Plan units and daily activities• Care for children• Supervise assistant ECEs• Deal with parents
SUPERVISOR	<ul style="list-style-type: none">• Several years of experience as an ECE	<ul style="list-style-type: none">• Oversee all the programs and activities of a daycare

EDUCATION & TRAINING

Each state has its own requirements for entering this field. Some states require ECEs to have special education or training. Other states don't require you to get much training. Most employers prefer to hire those who have been trained or certified.

In most states, you need at least a high school diploma. You might also need an associate or bachelor's degree. You can study early childhood education or child development. Depending on where you live, you might need to get both education and child care experience. Supervisors and directors must complete extra training.

Some states require ECEs to be certified as a Child Development Associate (CDA). The Council for Professional Recognition offers this designation. You need at least 120 hours of child care training and 480 hours of experience. The National Child Care Association (NCCA) also certifies ECEs.

It is helpful to take a course in first aid and CPR. In fact, some employers require you to have this training. Fire safety and child abuse prevention training are also recommended. You are usually required to show proof of immunization and have a police records check.

Central Michigan University (CMU) is one of the biggest universities in the US. The school is proud to offer a student-centered approach to education. CMU prompts students to look at the big picture and be proactive when it comes to social issues. For example, CMU built the College of Medicine to meet the need for primary care physicians in the state.

When we look at a building, we're mainly impressed with its physical and aesthetic features. However, there are all kinds of hidden concerns that most of us never question. For example, which materials best withstand environmental and physical threats? Or, what's the most efficient way to heat and cool an entire building? A major in architectural engineering connects such elements of building design and construction.

TYPICAL COURSES FOR THIS MAJOR

Each college that offers this major will have different requirements and specific courses. But, you can expect to learn about these types of subjects:

- Computer Programming for Engineering
- Environmental Systems for Buildings
- Computer-Assisted Drafting (CAD)
- Structural Analysis and Design
- Architectural Design
- Linear Algebra
- Calculus
- Electronics and Electrical Circuitry
- Construction Materials and Methods
- Energy Conservation in Buildings
- Differential Equations
- Building Materials
- Chemistry
- Physics

Some colleges require you to get some field experience before you graduate.

SKILLS LAB

In Skills Lab, you assess 35 skills and critically evaluate how often you wish to use each skill in your future career. This assessment is unique as it removes the anxiety and pressure that often comes with assessing how good you already are at a skill. Instead, it has you focusing on the skills you would most enjoy using, and which ones you value most.

Students can access the new skills assessment from their Student dashboard or within their About Me section.

After clicking on the *Get Started* button, students are presented with a series of 35 questions that have students consider how frequently they would like to use certain skills in their future career.

SKILLS LAB QUESTIONS

GOALS & PLANS

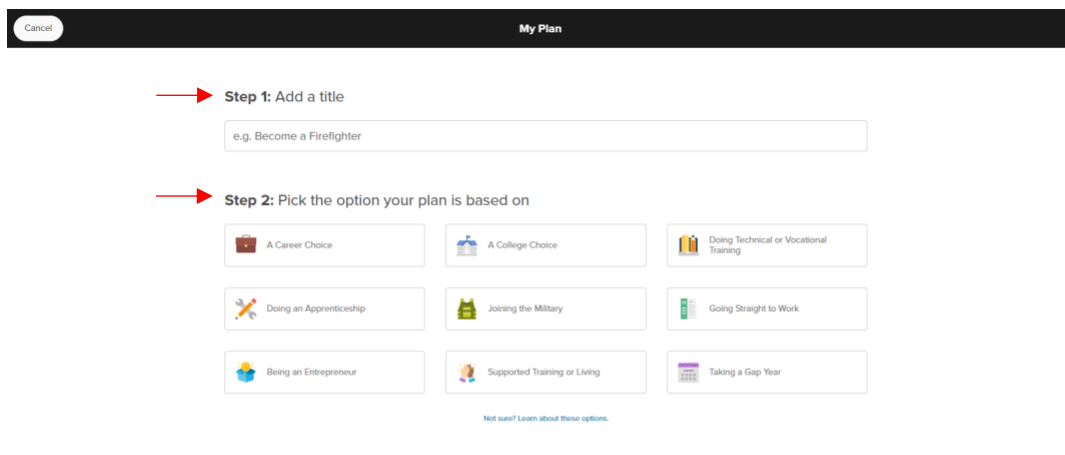

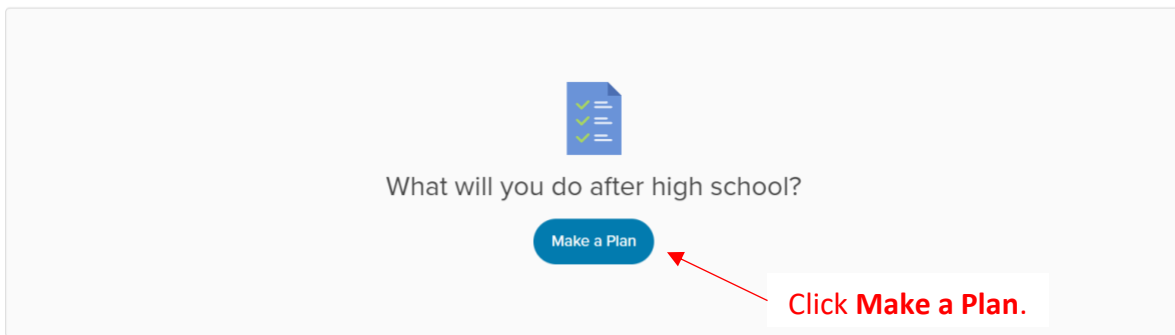

[Xello Goals and Plans Overview Video](#)

As you start to make plans for your future, you will first want to consider your options for after graduation. **To complete your 11th grade EDP requirements we ask that you create at least 1 plan.** Your Xello Plans should reflect your real-life plans. If you already know what your dream job is that is great! Create a plan for that dream job. Perhaps you are considering several different careers, you can create a plan for each of them. Hopefully as you explore all your options and research the steps you will need to take to achieve your goals you can narrow down your choices.

Click **Goals & Plans** in the top menu

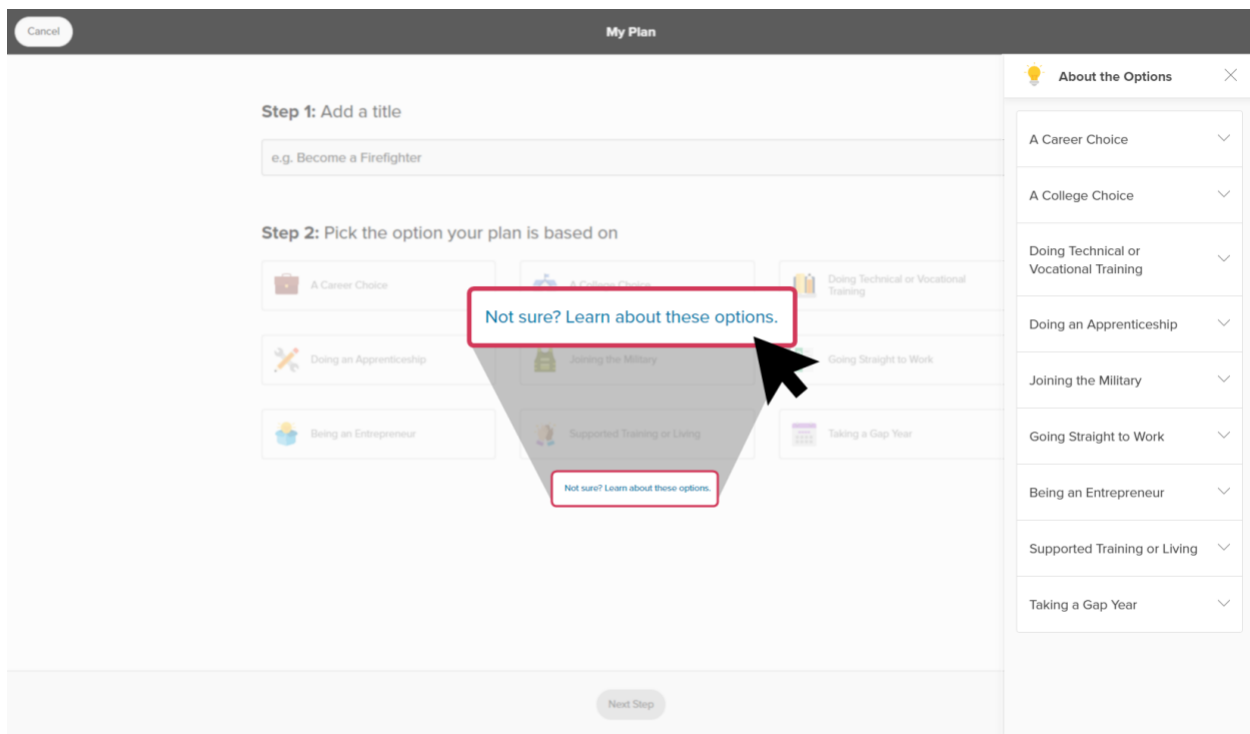

Make Future Plans

Step 1. Add a title

Step 2. Choose one of nine different pathways. Some of these pathways may be ones you've never considered, or even heard of before!

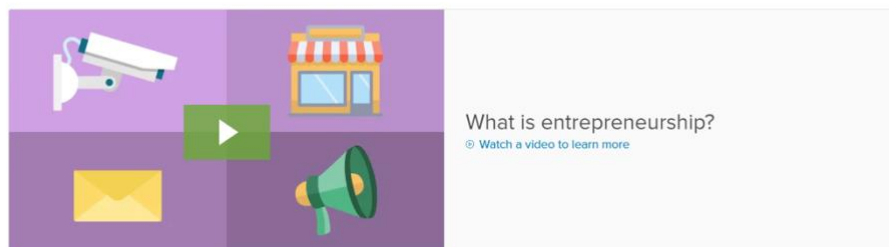

If you're not sure which option to choose, that's okay! You can click the **Not sure? Learn about these options** link which opens a menu to the side where they'll get a brief explanation, plus a chance to read a full profile of the option.

Pathway profiles include lots of information about the option, such as:

- A short video
- Sample careers they can explore
- Finances involved in taking that pathway
- Any requirements or education
- Other considerations for students to think about

Pathways Entrepreneurship

This pathway involves becoming an entrepreneur and being your own boss. This means you'll think up and start your own business.

You might invent and sell a new product. Or you might start a new business to sell an existing product or service.

Sample Careers

Step 3. Plans can change and evolve. There is always room to edit a plan, add or remove tasks, change the pathway, and add notes or reminders.

Once you have titled your plan and picked an option, you'll move on to step 3 which has you thinking about tasks you might need to complete. For each pathway, there is already a suggested task lists of to-do items. If you don't think you'll need to complete it, it can easily be removed.

Cancel My Plan

Construction worker

Going Straight to Work
Get on-the-job training Change

→ **Step 3: Add tasks to your to-do list** (Optional) 3 tasks selected

- Add a career to my plan Remove
- Talk to my counselor or family about going straight to work Remove
- Create a resume Remove

Done

Once you have created your plan, you can edit as much as you want!

Any information they added when first creating the plan is editable. This includes:

- At the top of the profile is a commitment level they can adjust as you learn more about future options.
- You can add more tasks to the to-do list, mark them as complete, or remove them. There's a helpful **Need Suggestions** button which offers tasks related to the option they chose.
- There's a section for you to add or remove careers. Your saved careers will populate at the top of the list for easy reference.
- You can take and keep notes as they explore. If you find websites related to your plan, you can add the link in your notes to keep everything in one place.
- If you haven't already, you can add a new pathway, or change an existing one. Any relevant saved options will show at the top of the list so you can easily pull in previous work.
- You also have the option to add details to the pathway. Details are dependent on the pathway and can include job or apprenticeship titles, schools or majors.
